

# AMCS SUBCONTRACTING

Management of the complete subcontracting lifecycle. From sourcing subcontractors and pricing through to issuing jobs and receiving confirmations & invoices.

## Overview

The AMCS Subcontracting platform provides an automation framework for all stages of the subcontracting process.

The solution is focussed on removing manual processes from your subcontracting operations from initial procurement through to receiving back job confirmations and supplier invoices.

The subcontracting platform greatly streamlines your operations producing both cost savings and process improvements.

The solution includes an operational web portal for management of the subcontractor network and also a separate subcontractor portal where they can receive their jobs and submit confirmations and invoices.

## Featured Highlights

### Sourcing

Used to identify suitable subcontractors by location or service profile and to manage the quotation or bidding process.

### On-Boarding

Once subcontractors are identified, management of profile information, contract terms, compliance and pricing.

### Jobs

Issuing of initial purchase orders to subcontractors for acceptance followed by issuance of individual jobs.

### Confirmations

Capturing of job confirmations including photos, signatures, attachments, actual dates, quantities and weights.

### Invoices

Capturing of detailed supplier invoices pre-matched to original work orders.

## Major Benefits

### Eliminate File Exports

No more file exports, phone calls or emails to send out jobs.

### Eliminate Data-Entry

Jobs & Confirmations are fully electronic with no data-entry & no errors.

### Instant Status

Get an immediate update of the job status as it is completed.

### Fully Matched

Invoices are fully matched to both job and confirmation.

### Network Insight

Get management insights into your subcontracted services and coverage.

### Reduced Administration

Dramatically reduce the administration effort of working with Subcontractors.
